QUOTES

It is through educational processes that we may all learn to live a more ethically responsive and harmonious life.

Peace is more than the absence of war. It is a state of Being. To accomplish this state of being, new educational models must evolve that further character development, conscious living skills and mutual understanding.

Education creates meaning so that life can be fulfilling and possibilities can become realities.

One world, one people, living together as a global family! Young people will cross religious, ethnic and cultural divides to recognize the universal human as family. WE ARE ONE and the elders of tomorrow will carry this torch.

It is truly only when we begin to see that injustice is only a symptom and an opportunity to design new models of governance, education and other options within the fields of endeavors that we will learn how it is to become truly conscious HUMANS.
